Item 1.01 Entry into a Material Definitive Agreement.

In February 2011, we entered into a product option agreement with AmDerma Pharmaceuticals, LLC, the parent company of Quinnova Pharmaceuticals, Inc. and an alliance member of Amneal Enterprises, for the sale of the option to exclusively sell and distribute our proprietary Microcyn-based acne drug candidate. On June 23, 2011, AmDerma exercised its option to license rights to the drug candidate.

On June 21, 2012, we entered into a collaboration agreement with AmDerma (the "Collaboration Agreement"). Pursuant to the Collaboration Agreement, AmDerma is responsible for the development of a Microcyn-based acne drug candidate in the United States, including all activities required to gain regulatory approvals. AmDerma will also be responsible for all costs. Additionally, within one year of the first commercial sale by AmDerma, AmDerma shall identify at least one secondary indication that AmDerma will develop. If AmDerma declines to pursue such secondary indication, then the right to develop such secondary indication will revert back to us.

We granted AmDerma an exclusive, royalty-bearing perpetual license in the United States and India, with the right to sublicense and subcontract in certain circumstances, and a right of first refusal to expand the territory of the license to include the European Union, Canada, Brazil, and Japan. We retained rights to the "rest of world."
